Oberführer Wilhelm Strasse

MISSION OBJECTIVES:

- Gain access to the supply convoy.
- Locate tram entrance.
- Infiltrate the secret lab
- Destroy the device
- Assassinate project leaders

TOP SECRET

MISSION: OMINOUS RUMORS

Secret Lab Facility

The newly formed SS Special Project Group has a fortress-like lab facility in the Hartz Mountains accessible only via a cable car. Until now, we have mostly ignored this group's activities because of its focus on the occult and other projects of dubious military value.

We recently intercepted a transfer order for a scientist named Oberführer (Senior Colonel) Wilhelm Strasse. It states he is to help project Fernstriker (Far striker) become fully operational. It is unclear from the message but it appears to be some sort of teleportation device which is currently capable of randomly sending objects anywhere in the world and later outputting the exact location. Strasse has been ordered to develop the "location stabilizer" which would enable it to teleport objects to a location first selected by the operator.

With the recent losses suffered by the Nazis in the Battle of Britain, it would be a great blow to the Allied war effort if this device can enable the Nazis to bomb targets anywhere in the world without the risks of bomber aircraft, or the range restrictions of V-2 rockets.

Orders are as follows: ride along with a shipment of equipment scheduled to arrive at the lab 21 NOV 1941. Gain access to the cable car and infiltrate lab. Procure any intelligence about the device and destroy it. Kill as many of the scientists working on this project as possible, this technology must not remain in enemy hands.

Good luck
